

March 23, 1976

building shall be built, and if you run ahead of the horse you might get trampled. There is a team effort involved in building the University of Nebraska and the Medical Center. Priority is the name of the game, and it seems that every dollar that we get ready to spend in this area is all number one priority. Senator, what is his name from Bellevue? The man that passes out the "thank you notes", Lewis, Frank Lewis from Bellevue. He says that this is the most important thing. Senator Chambers says the same. Yet we resoundingly put other things ahead of this very important project. Where oh where are we going? Please, dear colleagues, rest, relax and take a look. Here is another brick and mortar building, it is not needed at this time, but it is being sold on a very emotional basis that if this building is not built, that these services will not be available, yet we already know that they are here. Relax, sit back and vote red.

PRESIDENT: Senator R. Lewis.

SENATOR R. LEWIS: Mr. President, members of the Legislature. I would certainly question the wisdom of putting out this amount of money. I also question the wisdom of Senator F. Lewis' statement that this is going to produce an immediate result, it has a fine working relationship with the out-state doctors. I am a member of a statewide emergency medical service organization. The crying need at the moment is not more research, the problem is here, but it is more efficient treatment of those cases when the heart attack occurs in the home or on the farm or at work or on the highway. I think that we are talking about an altogether different situation here. I am not opposed to research. I think that it is absolutely necessary. I think that the Heart Association has done a tremendous job and has taken great strides in this. I think that if we sell this particular program and project on the premise that we are alleviating a condition in out-state Nebraska it is a little far fetched at the moment, and I would certainly not support this expenditure at this time.

PRESIDENT: Senator Burbach.

SENATOR BURBACH: I call for the question.

PRESIDENT: There has been a call that debate cease. Do I see five seconds? I do. The question is shall the debate now cease. Record your votes. Record.

CLERK: 26 ayes, 2 nays.

PRESIDENT: Debate ceases, Senator Marsh will you close debate please.

SENATOR MARSH: Mr. President, we are asking for \$250,000 in LB1009 for the planning of a cardiovascular center on the Medical Campus. I move for the advancement of this bill.

PRESIDENT: Record your votes. Have you voted? Have you all voted? Have you voted? Record. Senator Lewis.
